Our locking nut can be added for easy and positive locking . . . no tools required.

Holes are provided so zip ties can be utilized for strain relief and clean handling of wire.

Additional hole is provided so that luminaire and tree bracket assembly can be easily raised with a carabiner.

METALS:

Aluminum:

DESIGN APPLICATION:

Designed to be added to any riser stem so that it becomes adjustable. This is typically used on a 3" stem that has a luminaire attached to it. By adding this dual knuckle at the other end of the riser stem the luminaire can be adjusted in more than one location on the mounting. This is mostly used when mounting fixtures in trees to increase aiming ability of the mounting.

ORDERING LOGIC:

Model: AY - 7

Metal: A - Aluminum

Finish: BK - Black BKT - Black Texture
BZ - Bronze BZT - Bronze Texture
WT - White SL - Silver
BG - Beige CA - Clear Anodized

ORDERING EXAMPLE: AY - 7 - A - BK

An extension stem and a dual knuckle system can be used to allow for mounting the tree bracket on top of a limb while extending the luminaire out so it can be aimed as needed.
