

|                |                                     |
|----------------|-------------------------------------|
| Model          | MT-3                                |
| Voltage:       | 120V, 230V or 277V input/ 11.6V out |
| Wattage:       | 60W Dimmable                        |
| Material:      | Machined Aluminum Cap               |
| Mount:         | 1/2" NPS Thread                     |
| PVC Stake:     | Available in 12" or 18"             |
| Hardware:      | Stainless Steel                     |
| Cap Finishes:  | 7 Polyester Powder Coat             |
| Weight:        | 1.5 lbs.                            |
| Certification: | Wet location landscape, UL1838.     |
| Warranty:      | Aluminum: 10 Years                  |
| Dimensions:    | 2 3/4" dia. cap, 2 3/8" dia. stake  |

Shown in Bronze Powder Coat Finish (BZ)

## INTEGRAL ELECTRONIC TRANSFORMER:

For installations requiring 12V fixtures within a line-voltage system. The electronic transformer is integral within the stake mount below the fixture. Output of 11.6 volts.

1. Model TR - 6 (B+L)
  - 11.6V output
  - 120, 230, or 277 VAC input
  - 60W load maximum
  - No minimum load
  - Dimmable
  - C-UL-US UL Recognized component

## DESIGN FEATURE:

An important design feature of our Model MT-3 Mount offers improved performance when compared to the competition.

Instead of using three, very small 6-32 size allen screws, we use 10-32 size. They are located 1/2" from the base of the mounting cap to keep it out of the soil thereby reducing the chance of corrosion, being filled with dirt and stripping the hardware during maintenance.
